

Voluntary Product Accessibility Template (VPAT)

[Level Access](#) has completed two VPATs on behalf of Waterford.org—one for the web application and one for the tablet application—covering Waterford activities used in Waterford Early Learning and Waterford Upstart.

A **VPAT** is a document that explains how accessible a digital product is for people with disabilities. It describes how well a website or software works for individuals who may use screen readers, rely on keyboard navigation instead of a mouse, or have visual, hearing, motor, or cognitive disabilities.

A VPAT rates accessibility across specific standards and indicates whether a product:

1. Fully Supports
2. Partially Supports
3. Does Not Support
4. Not Applicable

Across all evaluated criteria, Waterford is rated as either **Fully Supports** or **Partially Supports**.

Waterford's rating of "Partially Supports" relates to standard accessibility criteria such as video captions. **For early learners who are not yet reading, traditional captions are not developmentally appropriate.** *In these cases, audio supports and other age-appropriate design features are used to ensure accessibility for young children.*

Waterford Institute – Accessibility Conformance Report WCAG and Revised Section 508 Edition

(Based on VPAT® Version 2.5Rev)

Name of Product/Version: Waterford Early Learning Desktop

Report Date: December 2025

Product Description: Waterford is a comprehensive early learning program for children in PreK–2nd grade. The program includes interactive, adaptive activities in reading, math, and science that adjust to each child’s individual learning pace. Activities are designed to engage children while building essential foundational skills, and progress is measured through embedded assessments.

Contact Information: accessibility@waterford.org

Notes: This VPAT reflects accessibility testing conducted on a representative sampling of student-facing activities via a web browser. The findings are intended to characterize common interaction patterns and activity types rather than every individual activity available in the product.

Evaluation Methods Used: Evaluation of the product involved a combination of automated, manual, and functional testing against the applicable success criteria within the Web Content Accessibility Guidelines (WCAG) 2.2 Conformance Levels A and AA and Section 508 standards. Level Access (Level) tested a selection of the product using a representative sample to cover the components and functionality of use flows. Below is a list of the assistive technologies (ATs) used:

- Chrome/NVDA
